

Wings-A-Loft™ Basic Remote Door Opening System

THE REMOTE DOOR OPENING SYSTEMS ARE DESIGNED TO LOCK/UNLOCK AND UNLATCH PROPERLY ADJUSTED AND FUNCTIONING DOORS.

THE DELOREAN DOOR LOCK AND LATCHING SYSTEMS ARE TWO TOTALLY SEPARATE SYSTEMS.

Therefore in order to replace the door lock solenoids with actuators and have remote door opening it is necessary to purchase two products; one of the Door Lock Upgrade Systems and one of the Remote Door Opening Systems.

[Basic Remote Door Opening System](#) - This system provides keyless entry (remote door lock/unlock), remote door opening (left door/both doors) using the AutoLoc KL800 controller. The KL800 comes with a limited lifetime warranty. With four extra channels, you can add on any of the following accessories.

K2100DP-x Wings-A-Loft™ Basic Remote Door Opening System \$199.95 + shipping

ACCESSORIES

[Remote Trunk Release System](#) - This system allows you to install an actuator so that your trunk can be opened using the remote included with K2100DP-x Basic Remote Door Opening System. The system includes the actuator, linkage, relay, socket and complete instructions.

K2905DP-x Wings-A-Loft™ Remote Trunk Release System \$39.95 + shipping

[Window Controller](#) - This window controller will allow you to operate your windows by remote. Requires 1 per window.

K2906DP Wings-A-Loft™ Window Controller \$39.95 + shipping

[Remote Starter/Ignition Kill Switch](#) - Use your remote to disable the starter/ignition switch. This can be very useful as a theft deterrent.

K2909DP Wings-A-Loft™ Remote Starter/Ignition Kill Switch \$9.95 + shipping

[Remote Battery Cut-Off Switch](#) - This device serves many useful purposes in the DeLorean; In addition to being a good theft deterrent, a battery cut-off switch will extend battery life, prevent dead batteries caused by slow current drains, and prevent short circuits from causing damage to the car's electrical system. This can be extremely important when a DeLorean is stored through the winter where rodents could chew through the wiring and cause an electrical short. This switch is designed to be remotely operated by our Wings-A-Loft controllers. Typical battery cut-off switches have unsightly handles or keys, and some require that the battery cover is removed to operate them. Our version uses a heavy-duty solenoid-style switch that is rated for 500 amps in-rush loads, with a bypass feature to maintain radio presets, clock function and anything else that requires constant power (like the Wings-A-Loft Basic controller). The main switch can be installed in the relay or battery compartment and is not visible when installed. This switch comes with a limited lifetime warranty.

K2913DP Wings-A-Loft™ Remote Battery Cut-Off Switch \$89.95 + shipping
